initiated in the Girdle of the Sands. It is one of the longest world quests in the entire game and features a vast amount of content. Doing this quest should guarantee players explore almost every area in the Girdle of the Sands. Related Knowing how to use Sorush and her abilities is essential in the Gavireh Lajavard and Realm of Farakhkert in Genshin Impact. Players will have to assist Sorush and the Paris in restoring the Harvisptokhm by cleansing the Sign of Apaosha. However, they will also have to deal with an outsider plotting to ruin everything. The satisfying ending, the sheer amount of exploration, lore expansion, and fun personalities in the quest make it quite enjoyable despite its length. Region: Inazuma Rewards: 1,500 Adventure EXP, 180 Primogems, 160,000 Mora, 1 Mask of Memories, 1 Memento Lens, 14 Mystic Enhancement Ore, and 16 Hero's Wit The quest "Ritou Escape Plan", which is part of the Inazuma Archon Quest, needs to be completed to start the "Sacred Sakura Cleansing Ritual" world quest. Sacred Sakura Cleansing Ritual is the main world quest on Inazuma's Narukami Island. The name of the world quest is quite self-explanatory on what players need to do. Hanachirusato, a shrine maiden in Konda Village, will request the help of the players to carry out the titular ritual. Despite being a short world quest, it has a lot of importance to the land of Inazuma as the cleansing ritual serves as a way to keep the nation healthy. The world quest has a consistent storyline and allows players to explore a lot of Narukami Island. The bittersweet ending is the cherry on top, which makes it one of the best world quests in the game. Region: Fontaine Rewards: 1,600 Adventure EXP, 180 Primogems, 170,000 Mora, 15 Mystic Enhancement Ore, and 17 Hero's Wit Ann of the Narzissenkreuz is easily one of the most confusing yet breathtaking world quests in the game. The areas players can explore with the enjoyable cast of NPCs make it a very fun ride. However, players not paying keen attention can easily feel lost in the vast amount of information revealed in this world quest. It is recommended to complete the world quest "Ancient Colors" to have a better story experience. This world quest opens the floodgates to one of the most interesting storylines in the game, featuring the Narzissenkreuz Ordo and their efforts to defy the prophecy of Tevyat's destruction. The world quest also features fun puzzles and a seamless experience which warrants it a spot on this list. Region: Sumeru Rewards: 1,900 Adventure EXP, 230 Primogems, 200,000 Mora, 20 Mystic Enhancement Ore, and 18 Hero's Wit Dirge of Bilqis is the direct continuation to Golden Slumber, and it improves upon its predecessor in terms of exploration. The world quest introduces players to the horrors of the desert's past through Liloupar, a Jinni sealed in a bottle while helping Jeht bring the remains of her father, Jebrael, and mother to the Eternal Oasis. It also explores the mindset of the various Eremite tribes and their ambitions. This world quest is relatively lengthy, but the payoff is well worth the time, as players can explore various areas in the Desert of Hadramaveth while uncovering the hidden past of the desert. The story ultimately ends at the beautiful Eternal Oasis and provides closure to Jeht's story arc until another tragic incident. Region: Inazuma Rewards: 1,600 Adventure EXP, 180 Primogems, 160,000 Mora, 16 Mystic Enhancement Ore, and 20 Hero's Wit Players will need to complete the world quest "Seirai Stormchasers" in order to start "Through The Mists". Through The Mists is one of the hardest world quests due to the unique properties found on Tsurumi Island upon arrival. This world quest also introduces Ruu, one of the most tragic NPCs in the entire game. Players will have to reset their time quite a lot to progress through the quest as the island is completely covered in fog. As the quest unfolds, players will get to realize the true reason for Ruu's appearance as well as the phantoms scattered around the island. It is a haunting yet heartbreaking reveal that portrays the bleak nature of the game's world at times. The captivating storyline and interesting lore make it one of the best world quests in Genshin Impact. Region: Sumeru Rewards: 5,050 Adventure EXP, 640 Primogems, 510,000 Mora, 39 Mystic Enhancement Ore, 39 Hero's Wit, 2 Vasoma Fruit, Garland, Araesha's Flower, The Siblings' Flower, Arakanta's Flower, and 2 Stories of You and the Aranara Aranyaka is the most infamous world quest in Genshin Impact for its incredible length. Players will have to devote more than ten hours at a minimum if they wish not to skip through the dialogues. However, the length of this world quest also makes it one of the best as it features so much content to experience. The Aranaras are one of the most adorable factions in the game. Helping each one of them while bringing balance to the Sumeru rainforest is a fun experience, as this world quest should help players explore almost every area. While players will get a bit disoriented by the amount of Aranaras and lore, it is a special experience that truly brings out the rich lore of Sumeru to the limelight. Region: Sumeru Rewards: 950 Adventure EXP, 120 Primogems, 75,000 Mora, 9 Mystic Enhancement Ore, and 9 Hero's Wit Her Foes Rage Like Great Waters... is the finale of Jeht's storyline. It is the shortest world quest on this list, but it carries a huge amount of emotional impact. After seemingly finding closure at the end of the Dirge of Bilqis world quest, Jeht is betrayed by Babel and the Tanits. Jeht's vengeance arc in the second half of this world quest is thrilling to follow, which reaches its crescendo at the Tanit Camps. Jeht manages to decimate the Tanit tribe with the help of the Traveller and murder Babel, becoming homeless in the process. However, the ending gives hope for Jeht's future as she finally achieves freedom. Region: Fontaine Rewards: 1,800 Adventure EXP, 220 Primogems, 195,000 Mora, 13 Mystic Enhancement Ore, and 17 Hero's Wit In the Wake of Narcissus is the grand finale of the Narzissenkreuz saga, which started with the Ann of the Narzissenkreuz world quest. Almost every other world quest in Fontaine has some ties to this particular storyline. This world quest features excellent storytelling, extensive lore drops, and a unique showdown. Related Scylla ability in Genshin Impact can help players move around the Sea of Bygone Eras swiftly. The conclusion of the Narzissenkreuz saga is quite satisfactory and ties many loose ends from the other smaller world quests. The Narzissenkreuz Ordo is one of the most peculiar factions in the game, and this world quest does justice to bringing closure to their story through emotional moments. Region: Fontaine Rewards: 1,350 Adventure EXP, 170 Primogems, 155,000 Mora, 7 Mystic Enhancement Ore, and 10 Hero's Wit Canticles of Harmony takes the spot as the best world quest in Genshin Impact. Introduced in Version 4.6, it helps the players explore Petrichor, the Faded Castle, and the Sea of Bygone Eras. There isn't a second where the visuals of this world quest are any less than stunning. The unique cast, notably Osse, Scylla, and Boethius, bring a certain charm to the world quest that really brings about the tragic history of Remuria. The bittersweet sacrifice of Cassiodor (Osse) to save the trapped souls, the beautiful ending cutscene, and the gorgeous aesthetics of the quest make it a one-of-a-kind experience. Adventure Rank Ascension 3 ・This quest will automatically unlock once you have reached Adventure Rank 45. Adventure Rank Ascension 4 ・This quest will automatically unlock once you have reached Adventure Rank 50. World Quests can be found while exploring Teyvat and talking to NPCs. Some NPCs will have quest indicators above their heads, while others require you to interact with them a certain way to unlock quests. Some World Quests can only be unlocked once you reach a certain Adventure Rank. Certain quests will even raise your max Adventure Rank and your World Level once you complete them, such as Ascension Quests. How to Raise Your World Level There are some World Quests that will begin just by being in the right area. These quests automatically go into your quest list the moment you draw near, and other quests may start a cutscene to indicate the start of the quest. Just like Archon and Story Quests, World Quests will provide a variety of rewards for completing. These rewards can range from Adventure Experience to Primogems so you should do as many as you can. Ascension Quests will not only give you the typical rewards, but they can also increase your World Level, which unlocks other features of the game. made of the remains of the third Descender and suggests the Traveler to head to Natlan. The Traveler returns to Sumeru to take a commission to find a missing person and meets Dainsleif again who reveals that the mysterious "Sinner" is "The Visionary" Vedrfolnir, Dainsleif's brother, who is one of the Five Sinners of Khaenri'ah. He also reveals that the Five Sinners became allured by the power of the Abyss and shared a world-shattering power among themselves. When the cataclysm came, none of them came to defend Khaenri'ah. After investigating the missing person, the Traveler finds Caribert, son of Clothar Alberich, who reveals that the Abyss Order's masterplan, the Loom of Fate, has entered operation. The Traveler briefly reunites with their sibling, in which they explain their reasons for leading the Abyss Order. Chapter V: Incandescent Ode of ResurrectionAct I: Flowers Resplendent on the Sun-Scorched SojournNatlanAct II: Black Stone Under a White StoneAct III: Beyond the Smoke and MirrorsAct IV: The Rainbow Destined to BurnInterlude: All Fires Fuel the FlameAct V: Incandescent Ode of ResurrectionAct VI: A Space and Time for You The Traveler and Paimon make themselves way to Natlan in search of the Pyro Archon, arriving in time to witness the Pilgrimage, a tournament dedicated to finding warriors to fight against the Abyss. These warriors who have an Ancient Name and are successful in the Pilgrimage will be sent to fight the Abyss and can be resurrected should they die in battle after the victory. However, Mavuika, the vessel of the Pyro Archon, is unable to resurrect Kachina, one of the warriors and suspends the Pilgrimage. The Traveler is tasked to head to the Night Kingdom along with the warriors to save Kachina from death. Returning to Natlan, the group learns that the nation will be destroyed in less than a year if the Abyss is not stopped. The Traveler then meets the First Fatui Harbinger Il Capitano, who reveals his own plan to save Natlan. Mavuika opposes his plan, as she has put her action into her own plan to save Natlan, which involves using the powers of Ronova, the God of Death. Eventually, Capitano agrees to her plan and forms a temporary alliance with her. The Abyss launches a full-scale invasion of the nation, resulting in huge casualties, and Mavuika, supported by six heroes with Ancient Names and her allies, defeats the Abyss, saving Natlan from the immediate disaster. After taking a short break and acquiring the Traveler's Ancient Name, Mavuika and the Traveler fight and defeat the remaining Abyssal force in the Night Kingdom, granting Natlan peace. Ronova demands Mavuika's death for having used her powers, but Capitano sacrifices himself in her place. Afterwards, Mavuika advises the Traveler to travel to Nod-Krai in Snezhnaya, governed by the Voynich Guild instead of the Fatui. She also warns them about Dottore's true plans of letting the people control all elements without needing a Vision. After a while, the Traveler and Paimon return back to "Collective of Plenty" and help Iansan, one of Six Heroes, patrol around the volcano. During the patrol, they encounter a cave and investigate inside. They discover the spaceship that brought the Traveler and their sibling to Tevyat and are ready to inform Iansan. She finds the two on time and informs that the Abyss Order attacks the tribe and the nation. The Traveler helps Natlaneses to defend their territory. After driving Abyssal force out, Natlan and Abyss Order are in stalemate and the Traveler use it as an opportunity investigate the Order. During the investigation, they meet a Khaenri'ah girl who was injured and let her rest while they continues investigating. They also meets Dainsleif and defeat the Abyssal force in Cinder City. The Traveler then returns back to the cave where they discovers that they were from different points in time. Their sibling arrives and reveals that the attack on Natlan was simply a trick to allow them to speak to Yohualtecuhtin, Lord of the Night, who allowed to give them some space to weave the new Ley Lines and the Ley Lines of Khaenri'ah are completed, reviving Khaenri'ah. The sibling also reveals that they searched the whole planet, and found no trace of the Traveler anywhere, and when the sibling first arrived in Khaenri'ah, their memory was wiped off. Returning back to the Masters of Night-Wind, the Traveler learns that Yohualtecuhtin intrigued at the thought of preserving a nation as an "Atlas" and allowed the sibling to perform their experiment when she was assured Natlan would not be affected. Heading back to the cave, they fall asleep and note a soothing presence as they do so. The following table contains acts that are unrelated to each other[x] and are part of Teyvat's plot. ActsPartsLocationAct I: The Crane Returns on the WindPart I: Jade Chamber RisingJade Chamber, LiyuePart II: Seagaze SunsetPart III: Bygones Time Like Dust PassingPart IV: Where The Heart Finds Rest Several months after the Traveler first met their sibling since the former awoke in Teyvat, the Traveler overhears Tianquan's announcement to rebuild the Jade Chamber and her answers to the first three people who could acquire three rare materials needed to build the Jade Chamber. Using an opportunity to ask her a question about their sibling, the Traveler approaches Tianquan who goes for Ningguang to announce their intention to participate in rebuilding contest. Along the contest, the Traveler recuses Shenhe from harassment and in return, she assists them to collect the materials. After taking her to rest, they briefly bump into Cloud Retainer who reveals Shenhe's background as the daughter of a family of exorcists which she adopted. She warns that a calamity is coming soon and the adepti would not hesitate to seize control should Liyue's people fail to rectify the crisis. After submitting the required materials, the Traveler, having won the contest, asks Ningguang about their sibling's whereabout in which she answers that she hasn't found any leads regarding their sibling. Afterwards, Jade Chamber refloats again. However, a different ancient serpent god, Beisht attacks Liyue to avenge Osial, who was her husband. Once again, Ningguang and the Liyue people successfully defeat Beisht with the help of Shenhe and the Traveler, and celebrate their first victory since Rex Lapis's retirement. Act II: Perilous TrailPart I: The Unexpected GuestThe Chasm, LiyuePart II: Chasmic MazePart III: Danger All AroundPart IV: End of the LinePart V: At Tunnel's End, Light After the repeal of Vision Hunt Decree and investigation in the Chasm, the Traveler and Paimon return to where they find the mysterious Chasm Nail, only to find Yanfei looking towards it. After she tells them she's on important business and leaves, Arataki Itto and Kuki Shinobu arrive, the former looking for Yanfei. After giving Itto wrong direction, the Traveler heads to the ground below the nail and finds Yanfei again. Yelan and later the duo arrive and she warns them to leave for their own safety which offends Itto. As the two prepare to fight, the ground beneath the group cracks and sends them falling down into The Chasm's Bed. After investigating and exploring the surroundings, the group finds themselves back in the same place they started. They spread out to look for more potential exits but are unable to. Yanfei notes that the ceiling above seems to have sealed up completely. The Traveler tries to call Xiao but to no avail. A day later, Paimon complains that it has felt like 20 days to her, while the Traveler feels as if only one day had passed. The group then realizes that since they've been stuck inside, the time seems to be frozen or distorted. After discovering a hidden path, they hear Xiao talking to someone and he appears to be struggling, prompting them to assist. After exploring, they encounter a door that leads into the opener's worst fear. For the Traveler's case, their fear is being in the darkness of the Abyss that took their sibling away. After barely escaping the door, the mental fatigue sinks onto the group, causing them to retreat back to the camp. After dispelling another illusion and rescuing Xiao, he reveals to the group that he is looking for his missing brother-in-arms and fellow Yaksha, Bosacius, and believes that he was inside The Chasm. He leads the group and the group finds the Fantastic Compass that leads them back to the Surface. The group gradually leaves until the Traveler is left with Xiao who reflects on his suicidal plan and his past actions, agreeing with the Traveler that those who died defending Liyue are heroes of history. Act III: Inversion of GenesisPart I: The Night-Bird Falls at the Curtain's CallSanctuary of Surasthana, SumeruPart II: A Dance of DestructionPart III: The Kabukimono's FinalePart IV: As Though Morning Dew After the Sumeru crisis was solved, during their journey across the Teyvat, Paimon suggests to the Traveler that they go visit Lesser Lord Kusanali as they have many questions left unanswered, such as the "Descenders". As they make their way to the Sanctuary of Surasthana, they find two Inazumans arguing over the Tatarasuna mystery which gets their attention. They explain the mystery and Kaedehara Clan's downfall and reveals a kabukimono was not a human but a puppet which the Traveler deduces it to be Scaramouche. As they are debating, Scaramouche is spotted walking by and, worrying that he might have escaped, the Traveler go to the Sanctuary to warn Kusanali. She reveals that she made a deal with Scaramouche to investigate Irminsul on her behalf and that following his defeat, he had been discarded by Dottore. She also proposes for them to join force the investigation. After a brief argument, the Traveler and Scaramouche reluctantly agree to her proposal. Inside Irminsul, they discover the situation of the Tatarasuna mystery – Dottore, disguised as Escher, sabotaged the Tatarasuna furnace to corrupt Scaramouche with malevolent spirits and stabbed Niwa to death. After calming down, Scaramouche reveals the Traveler's sibling's activities in Khaenri'ah after arriving in the nation. He then shuts Kusanali off and privately tells the Traveler that Niwa and his other friends deserved a second chance for a better fate. Afterwards, he heads into the heart of Irminsul to erase himself from time. By time Kusanali reconnects, Scaramouche is gone, having been erased from time. The next day, when the Traveler mentions Scaramouche, Paimon does not remember him, leaving the Traveler alarmed and they head to Inazuma to see if anything had changed. In Inazuma, the Traveler learns that while the incident still occurred, the history regarding the Tatarasuna mystery is altered. They inform Kusanali who also does not remember Scaramouche. Left with no other choice, they tell her and Paimon about him. Nahida reveals that Scaramouche's erasure revises Irminsul however, as a "Descender", the Traveler is not affected by any revisions. The Traveler recalls that Rukkhadevata told them that one could not completely erase themselves, realizing that Scaramouche is still alive. They encounter Scaramouche (now the Wanderer) eventually and follow him. Kusanali then catches up to them and shows Scaramouche his past, which he eventually accepts. As the sudden surge of painful memories flows through him, a projection of the Shouki no Kami emerges to attack, but Scaramouche manages to compose himself and eliminates it with his newly acquired Anemo Vision. With the recovery a success, they leave the dream to discuss about the Sibling's travels and Scaramouche's future. Scaramouche questions the Traveler why they went to Inazuma. After hearing their explanation, he decides to consider it a favor to be owed and agrees to help them wherever he could. In return, the Traveler, at his request, picks out a suitable name for him. After giving him a new name, he decides to get revenge on Dottore for his manipulation. However, Kusanali urges moderation as he needs time to compose himself. Returning back to the inn from earlier, a strange voice reveals the Traveler that the fate of Teyvat could not be easily changed and that they should believe their own eyes before fading away, leaving the Traveler wondering what awaits them in the future. Act IV: ParalogismPart I: Crimes One and TwoMondstadt City, MondstadtPart II: The Hunger of ManyPart III: The Gardener The Traveler and Paimon return to Mondstadt to celebrate Windblume Festival and pay a visit to Katheryne, who tells them that something was unusual around them. They notice Beatrice rejecting Quinn's offers to spend time with her, Miles approaching the two and telling them that he had been sleepwalking recently and even found himself outside at times – checkups had not diagnosed him with any ailments – and Donna's remark about finding the ideal man, which Paimon finds unusual as she had always been infatuated with Diluc. Kaeya who passes by tells the Traveler and Paimon that Jean had been looking for them when they returned, stating that the matter at hand needed to be discussed at the Knights of Favonius Headquarters. Inside, Jean tells them and the other captains that with recent events, she had called all the captains to hold a trial. The Traveler then notices that Albedo hadn't been among the captains, in which Jean confirms that Albedo is the one going on trial. Jean and the captains went to oversee the trial with Jean being the judge. During the trial, the prosecutor, Hertha, accuses Albedo of murder and illegal disposal of human remains in which Albedo testifies that he was in his office that night, doing a research about Dragonspine, and insists that he had no motive to kill anyone. The prosecutor then reveals a correspondence letter that detailed his activities. With enough proof leaning towards his implication, Albedo is found guilty and taken away but is reassured that he could submit an appeal. Inside Jean's office, some captains voice their discontent with the outcome, believing that Albedo was innocent. Jean privately agrees with them, but insists that the verdict must be upheld. After investigating independently on Jean's order, the Traveler finds the third location in Dragonspine where unlike the first two locations, there is no body inside that hole. Returning to the Knights of Favonius, they inform Jean of the development. She tells them that the remains were being investigated and informed them that the second trial will take place in two days. During the second trial, the evidences are piling against Albedo who insists that he had not killed anyone and was exercising restraint. After the Traveler testifies that the third location was different compared to the other two, Albedo reveals that a while ago, someone had tried to eliminate him in secret, but he killed and buried them there instead, which is supported by Eula since she and her friends had also been there that day, and he killed a "person" but not a human. Just then, another Hertha arrives in the court. The prosecuting Hertha accuses Albedo of trying to undermine her, while Albedo reveals that he had been stationed in Dragonspine to monitor Durin, the dragon that Dvalin and Barbatos slew during the Cataclysm, who has been slowly reviving. Hertha, who just arrived, exposes the imposter by showing her scarred arm, causing the latter to flee. Outside the church, Durin's minions launches a full-scale invasion on Mondstadt City but eventually are defeated. Afterwards, Albedo requests a meeting between Knights/Church of Favonius, the Anemo Archon and the Hexenzirkel which Alice, founder of Hexenzirkel, approves. Heading up to Albedo's office, Mini Durin reveals that as part of Albedo's plan, he would take over the deceased Durin to be revived as a human with an approval from the Wanderer. Inside the Imaginarium Theater, Albedo intends to kill and resurrect Durin in a different form by using Mini Durin as Durin would pose a threat to all of Teyvat should he revived at full force. Alice accepts the request, but tells them they must pass a trial involving the chessboard which they pass. Using materials acquired from the Hexenzirkel, Albedo drains Durin's core of its energy and proceeds to conduct a ritual to replace Durin with Mini Durin, leading to a success. Afterwards, he then reveals that his creator Rhinedottir had devoured Naberius, Ruler of Life, but he believes that the two are now one. Genshin Impact began development as early as late January 2017, with an initial team of 120 people, which grew to 400 by the end of that year, and reached 700 by February 2021.[59][60] miHoYo revealed the game in June 2019 at E3 2019.[61][62] The game was developed using the Unity Engine.[63] The game had a development and marketing budget of around $100 million, making it one of the most expensive video games to develop.[64] Between the announcement and release closed beta tests were held, allowing invited players to explore and interact with the open world.[65][66] The game includes voice-overs in four languages, and 15 different languages for text.[67][68][69][y] miHoYo took inspirations from real life locations, such as Zhangjiajie National Forest Park in the Hunan province of China, whilst developing the world of Teyvat. The Legend of Zelda: Breath of the Wild is held in high regard by the development team, and is cited as one of the main inspirations for Genshin Impact.[70] Development was aimed at making the game different and fun from other MMORPGs in terms of its quest and combat systems as well as its random events and mode of exploration.[71] The game was designed to be cross-platform as developing the game for PC and console allowed the developers to raise graphical fidelity for the game, such as rendering realistic shadows.[70] The overall artistic vision of the game was intended to combine an anime style with more key elements from real-world cultures,[72] and each nation is based on a region of the world: Mondstadt is based on traditional high fantasy, with German influence. The name is German for "moon city".[73] Liyue combines various eras of China's history into one region, and re-imagines Chinese culture through a fantasy perspective.[74] Its artistic references include China's Zhangjiajie National Forest Park, Huanglong Scenic Area, the landscape of Guilin, Fenghuang Ancient Town, and the Hanging Temple in Shanxi. The name is Chinese for "glazed moon" (璃月). Inazuma, a closed-off archipelago ruled by a shogun, is inspired by Edo Japan, and is named after the Japanese word for lightning (稲妻).[75][76][77] Sumeru is a nation of rainforests on the east and deserts on the west that is based on the cultures of the Middle East, North Africa, and South Asia.[78][79] The name is the Sanskrit term for Mount Meru (□□□□□). Fontaine takes inspiration from steampunk and the trends of the Belle Époque, as well as other cultures like that of the Basques and Corsicans. It is also inspired by the geography of the Alps and by the Baroque and Art Deco styles.[80] The name means "fountain" in French. Natlan is most likely named after the legendary homeland of the Aztecs, Aztlán, and seems inspired by several indigenous cultures, primarily those of Pre-Columbian Latin America, Sub-Saharan Africa, and Oceania, though more modern Latin American influences like breakdancing, Southeast Asia culture, and African-American culture are also present. Geographically, the terrain of Natlan is modeled after landscapes such as horst and grabens and mesas, taken from various African and South American canyons and landscapes such as the Chapada Diamantina, and the Blyde River Canyon. Unlike the other nations which have a central ruler, Natlan has six tribes ruled by respective chiefs under federation rule, with the Pyro Archon serving as a unifying figure. The names of all six tribes are derived from the Aztec Thirteen Heavens. Nanatzcayan is likely derived from Ilhuicatl-Nanatzcayan. In the name of the Aztec heaven (also known as Ilhuicatl-Itzapan-Nanatzcayan; "The sky where obsidian stones clash in water"), the "clashing" alludes to the noise preceding hailstorms. The tribe name means "the place where it crashes" in Nahuatl. Many members of the tribe have Mayan names, mainly deriving from the names of deities and historical figures, while some other members have Nahuatl names. Meztli is possibly named after Meztli, a god or goddess of the moon, who ruled Ilhuicatl-Meztli. Many members of the tribe have Polynesian names and the tribe may also take inspiration from Hawaii Islands due to the hot springs and its location near the water. Huitztlan is likely associated with Quetzalcoatl, who was related to wind. Many members of the tribe have Quechuan names and the tribe may also take inspiration from Incan Empire or even Machu Picchu due to high ground from the surface. Tlalocan is named after the god of rain and thunder, Tlaloc. The name Flower-Feather Clan could also allude to the Aztec goddess Xochiquetzal (Nahuatl: Xochitl "Flower"; Quetzalli "Quetzal Feather") meaning "flower precious feather." Mictlan is named after the Aztec underworld. The name Masters of the Night-Wind could allude to Yohualli Ehécatl, meaning "night wind," one of the epithets given to Tezcatlipoca, who is associated with the night sky, obsidian, hurricanes, and divination. Teteocan likely gets its name from Ilhuicatl-Teteocan, which is ruled by the Creator-Brothers gods, the four Tezcatlipocas. Ilhuicatl-Teteocan (Nahuatl: Ilhuicatl "heaven"; teteo "gods"; can "place") means "the heaven that is the place of the gods", a nod to where Xbalanque, the yet-frst Pyro Archon, fought against Xiuhcoatl, the Pyro Sovereign. Kingdom of the Lord of the Night, also known as Night Kingdom, is a realm, located deep under the region of Natlan, where the souls of dead reside and can be brought back to live should their team wins the battle against Abyss and which is ruled by Yohualtecuhtin, the Lord of the Night. The Kingdom may have reference to Xibalba where the souls of the dead reside, ruled by the Maya death gods. Snezhnaya takes inspiration from both Soviet-era and Imperial Russia. The name is Russian for "snowy" (Снежная). Nod-Krai is a region in Southern Snezhnaya where the Voynich Guild governs instead of the Fatui. Nod-Krai could possibly be taken from the Land of Nod (Hebrew: אֶרֶץ־נוֹד – ʾereṣ-Nōḏ) a place mentioned in the Book of Genesis where Cain was exiled by God after Cain had murdered his brother Abel. Krai is a type of federal subject of Russia, the Czech Republic, Slovakia and Latvia, with the word meaning "edge" or "region" in Russian, Ukrainian, Belarussian and Bulgarian. Khaenri'ah is mainly based on Germanic and Nordic mythology, such as the Nibelungenlied. The name may be derived from an Arabic phrase meaning "betrayer of winds" (خائن رياح). The game's primary mythological basis is Gnosticism, particularly the way it understands relationships between humans and their world, and how gods may influence this relationship.[81] The name given to Teyvat's gods, "Archon", is inspired by the related deities from the Gnostic tradition. Although each Archon has a personal name for their "vessel", or human form, and is referred to with a specific title by the citizens of their nation, most gods in the game's story – even those who are not Archons – take the names of demons from the Ars Goetia, the first volume of The Lesser Key of Solomon.[49] Main article: Music of Genshin Impact The music team headed by Yu-Peng Chen from HOYO-MiX composed the game's original score, which was performed by the London Philharmonic Orchestra, the Shanghai Symphony Orchestra, and the Tokyo Philharmonic Orchestra.[82][83][84] The approach to creating the soundtrack is to immerse players within the game, and provide emotional and beautiful melodies.[85] Chen composes the score based on the cultural influences of different regions.[86] For example, in Mondstadt, Chen used woodwind instruments to reflect Mondstadt's association with wind and freedom.[85] In Liyue, Chen used elements of Chinese folk music—traditional instruments, the pentatonic scale, and ancient tonal melodies—with Western romantic harmonies and orchestral arrangements.[87][88] The Divine Damsel of Devastation uses the singing style of Chinese opera.[89] In contrast, the battle themes use polyphony and other composing techniques, as well as mimicking orchestration elements from composers such as Beethoven.[85] Several soundtrack albums featuring music about characters and regions of the game have been released periodically.[90][91][92][93][94] For his work on the soundtrack Chen was awarded the "Outstanding Artist—Newcomer/Breakthrough" at the 2020 Annual Game Music Awards.[85] In an interview published in April 2021 Chen expressed interest in releasing the soundtracks on CD, as well as hosting concerts in the future.[85] The first concert was held virtually on October 3, 2021, titled "Melodies of an Endless Journey" and featured multiple bands and an orchestra performing various soundtracks from the game.[95][96][97][98] A second virtual concert was held on February 4, 2022, titled "Reflections of Spring" featuring the Shanghai Symphony Orchestra performing soundtracks from the Liyue region.[99][100] On September 12, 2023, Yu-Peng Chen announced on Bilibili that he was leaving miHoYo and the HOYO-MiX team, and was no longer working on the soundtrack.[101][102] The worldwide release, September 28, 2020, was announced on August 17 for PC and mobile platforms, and on August 28, it was revealed that the PlayStation 4 version was released on the same date.[103][104] The game was made available on PlayStation 5 through backwards compatibility on November 11.[105][1] On April 28, 2021, the PlayStation 5 version of the game was released, featuring enhanced visuals, improved loading times, and DualSense controller support.[106][107][108] A Nintendo Switch version has been in development since January 2020.[109][110] As of January 2025, no updates have been provided on the status of the Switch port leading some to come to the conclusion that it was quietly cancelled. Prior to its release the game had over 10 million registrations, with over half of that from outside China.[111][112] According to some, the game was the biggest international release of any Chinese video game.[64][113] In the lead up to release, the game won the Tokyo Game Show Media Awards 2020 public poll, ranking first among 14 other games.[114] Shortly after the game's launch, miHoYo announced a schedule for content updates over the following months.[115] As a long-term project, much of the game remains to be finished. On release, only two of the seven major regions intended for the game were released, and miHoYo anticipates it will take several years for the game's story to be completed.[116] In a presentation given in February 2021, miHoYo former president Cai Haoyu estimated that ongoing development for the game would cost $200 million per year.[60] Updates are implemented into the game every six weeks[z][115] and adds more characters, events and new areas of Teyvat;[117][1][118] each update comes with character banners which last around three weeks until the next update.[119] Character banners buff the chance of getting a character, but still with the chance of getting a standard character, also known as a 50/50; if a 50/50 is lost, during the next banner, the buffed character will be guaranteed.[120] Major updates ("Versions"), adding new major regions, are implemented annually. As of version 5.5 (April 2025),[121] five major versions with an additional 35 updates have been released.[122] Each update includes compensation in the form of 60 primogems – the currency used for the game's gacha system – for each hour the server is offline.[123][124] ReceptionAggregate scoresAggregatorScoreMetacriticiOS: 82/100[125]PC: 84/100[126]PS4: 81/100[127]PS5: 86/100[128]OpenCritic87%[135]Review scoresPublicationScoreDestructoid7.5/10[5]Famitsu35/40[129]Game Informer9.25/10[130]GameSpot7/10[10]Hardcore Gamer4/5[131]IGN9/10[27]Jeuxvideo.com15/20[132]PC Gamer (US)84/100[133]Pocket Gamer[134] When the game was first unveiled at the ChinaJoy convention in 2019, it was immediately and initially met with criticisms claiming that the game had similarities to Breath of the Wild.[136] Zelda fans at the convention showed explicit gestures towards the Sony booth, with one individual destroying their PlayStation 4 console in protest.[137] Kamui Ye of IGN China highlighted similarities between the two games such as the overworld, art style and game mechanics while also emphasizing Genshin Impact's unique identity and features.[138] Genshin Impact receives "generally favorable reviews" according to review aggregator Metacritic.[126][127] The open world of Teyvat drew praise; IGN's Travis Northup described Teyvat as "a world that is absolutely bursting at the seams with possibilities", and Hardcore Gamer's Jordan Helm described it as "one big environmental puzzle".[27][131] Liyue in particular was picked out by Kotaku's Sisi Jiang for being "one of the most exciting regions that I've visited in a video game in years", before continuing on to discuss how the region "shows an idealized portrayal of Chinese social relations that exists in localized pockets".[139] Game Informer characterized the game as an incredible experience, noting that "[t]he gameplay loop of collection, upgrading, and customization is captivating and compelling".[130] The execution of gameplay impressed Pocket Gamer, and Destructoid's Chris Carter called the combat system "one of the most interesting things" about the game.[5][134] NPR remarked that the game had an abundance of content despite being free to play.[140] Gene Park of The Washington Post lauded the game as revolutionary for the genre, having players "imagine a mobile gaming world with titles with quality that matches the industry's top-tier experiences".[141] Polygon also praised the game for differentiating itself from its peers, heralding its arrival as mobile games become more mainstream and appealing to "an audience outside the typical mobile gaming demographic" and "new players without the hardware to play more conventional and resource-hogging RPGs".[142] Conversely, Genshin Impact has been criticized for its endgame content, its gacha monetization system, and its self-limitations. Ari Nortis of Kotaku, for instance, wrote that although the game provides a solid experience it also has "some of the typical bullshit that comes along with a zero-dollar price tag" and that the gacha system can lead to a "cycle that belongs more in Reno, Nevada, than a magical fantasy land of gods and wizards".[143] GameSpot echoed this criticism, noting that the game is "hampered a bit by the restrictions its free-to-play model imposes".[10] PC Gamer said that playing the endgame becomes "a slog", and that the resin system "feels so unnecessary".[144] Warning players about how predatory the monetization is, The Washington Post added that such a well-designed game from an aesthetic standpoint can lead some to gamble with the game's gacha system.[21] When the Genius Invokation TCG minigame launched, it received positive comments from critics. CBR compared the non standalone card games with Hearthstone from World of Warcraft and Gwent from The Witcher 3, and believed that it could expand the game's audience.[145][146] Siliconera critic Stephanie Liu said that the minigame rekindled her excitement in the early days of the game.[147] Gamersky editor Youming Xingkong said that the Genius Invokation TCG is an attempt to keep players fresh in Genshin Impact and solve the burnout that will occur in long-term operation games.[36] The Youxiputao editor also pointed out that Genius Invokation TCG can "make up for the shortcomings of the game's long-term experience" and "strengthen the relationship between players".[37] Prior to launch, fans had already made a Genius Invokation TCG mod on Tabletop Simulator.[148][149] On mobile platforms, Genshin Impact saw 23 million downloads and grossed approximately $60 million within a week after its release.[142][113] Within two weeks, that figure rose to over $100 million, recouping its development and marketing budget.[150] Its strong performance continued through October 2020 as the game was the highest-grossing game worldwide during that month.[151] Its largest revenue came from China, Japan, South Korea, and the United States, with 69 percent of mobile revenue coming from outside China itself during this time period specifically.[152][153] In the United States, its release was the largest launch of a role-playing game on mobile in history.[153] On mobile platforms, Genshin Impact had grossed over $393 million within two months after release and over $1 billion by the end of March 2021, the third highest revenue from a mobile game during that time frame after Honor of Kings and PUBG Mobile, making it one of the highest grossing mobile games of all time and the fastest game to reach that milestone on Google Play and the App Store.[154] By October 2021, the game had grossed $2 billion.[155][156] It became the world's third highest-grossing mobile game of 2021,[157] with $1.9 billion grossed that year.[158] By December 2021, the game had grossed $3 billion on iOS and Android devices worldwide. The game's largest mobile market is China with 30% of revenue, followed by Japan with 23% and then the United States with 20% of revenue.[159] Based on a December 16, 2023 survey conducted by Nikkei Entertainment, the fanbase of Genshin Impact within Japan has an average age of 27 years, and a male-to-female ratio that skews 60:40.[160] But according to another December 2023 survey, Japan and other Asian countries have a relatively more male skew in their player base compared to the West and it actually has a 55:45 male to female ratio globally.[161][162] Across all platforms (including mobile, console and computer platforms), the game is estimated to have grossed nearly $3.7 billion in its first year by September 2021, the highest ever first-year launch revenue for any video game.[163] In that same month, the Raiden Shogun's debut banner earned $33,020,905 among iOS users in China alone.[164][better source needed] The mobile version grossed a further $567 million between January and March 2022,[165] adding up to more than $4.267 billion grossed as of March 2022[update]. The game's commercial success has often been attributed to its visual design and use of Chinese cultural references.[166]:261 Year Award Category Result Ref. 2020 TapTap Game Awards Game of the Year Won [167] Golden Joystick Awards Ultimate Game of the Year Nominated [168] App Store Best of 2020 iPhone Game of the Year Won [169] Google Play Awards Best Game Won [170] Google Play Users' Choice Awards Best Game Nominated [171] The Game Awards 2020 Best Mobile Game Nominated [172] Best Role Playing Game Nominated 2021 Apple Design Awards Visual and Graphics Won [173] Pocket Gamer Mobile Games Awards People's Choice Nominated [174] Best Audio / Visual Accomplishment Won Game of the Year Won Golden Joystick Awards Still Playing Award Nominated [175] PlayStation Partner Awards Grand Award Won [176] The Game Awards 2021 Best Mobile Game Won [177] Best Ongoing Game Nominated 2022 Golden Joystick Awards Still Playing Award Won [178] Google Play Awards Best Ongoing Won [179] PlayStation Partner Awards Grand Award Won [180] The Game Awards 2022 Best Ongoing Game Nominated [181] Best Mobile Game Nominated Players' Voice Won 2023 Golden Joystick Awards Still Playing Award Nominated [182] PlayStation Partner Awards Grand Award Won [183] The Game Awards 2023 Best Ongoing Game Nominated [184] Players' Voice Nominated 2024 20th British Academy Games Awards Evolving Game Nominated [185] Gamescom Awards Best Mobile Game Won [186] PlayStation Partner Awards Excellence Award Won [187] The Game Awards 2024 Players' Voice Nominated [188] A Juneyao Airlines Boeing 787-9 featuring the Genshin Impact livery, in collaboration with miHoYo According to Mobile Games Insider, within two years of its launch, Genshin Impact had collaborated with food and beverage brands 12 times and with tourist destinations 11 times,[189] including partnerships with Alipay, Heytea, Pizza Hut, Mengniu Suibian, Amap, Redmi, Nippon Paint, KFC, OnePlus, and others.[190] In March 2021, Genshin Impact partnered with KFC in Mainland China for a cross-promotional event.[191][192] On March 6, miHoYo officially announced the collaboration with KFC, launching Genshin Impact-themed stores and offering themed postcards and badges with meals.[193][194][195] The event was wildly popular, with many fans cosplaying as game characters while visiting themed stores.[196] However, on March 13, KFC announced on Sina Weibo that due to overcrowding in themed stores in Shanghai and Hangzhou, violating pandemic regulations, the events in those cities would be canceled.[197] The event's slogan, "Meet in another world, enjoy the delicacies," became a new Internet meme, and discussions of the collaboration spread beyond ACG fans to include Reddit users, as well as both gaming and non-gaming media.[198][199] Additionally, according to incomplete statistics from Xinmin Evening News, Genshin Impact partnered with at least 14 brands, including Lawson, Alipay, and Amap in the second half of 2022.[200] On September 20, 2023, to commemorate the third anniversary of Genshin Impact, QQ Music and WeSing held a celebratory event for Genshin Impact players.[201] On November 3, 2023, Genshin Impact announced a renewed collaboration with Juneyao Airlines, unveiling the world's first Genshin Impact-themed livery on a Boeing 787-9 Dreamliner, called "Genshin" (registration number B-209R), which began operating domestic and international routes for Juneyao Airlines on November 8. According to the partnership plan, the livery will remain for at least one year, and Genshin Impact merchandise such as a 1:150 scale model of the "Genshin" Boeing 787, a third-anniversary blanket, and passport covers will be available for purchase.[202][203] Outside Mainland China, on July 29, 2021, Japan's Sweets Paradise announced that starting from September 1, all of its cafes in Japan would become Genshin Impact collaboration cafes for one month. In addition to offering food-themed around Mondstadt from the game, they also released exclusive pre-order merchandise.[204] From December 3 to 14, 2021, miHoYo hosted the HOYO-FEST event in Southeast Asia, including Malaysia, Singapore, Thailand, Indonesia, and the Philippines. During the event, local partner restaurants offered Genshin Impact-themed meals and merchandise.[205] Prior to the release of the game, miHoYo released a manga on their websites detailing the background of its characters and the fictional world of Teyvat.[35] It is translated into various different languages though only 13[206][207] of its 16[35] chapters were officially released in certain languages. Various other artwork and short comics are also released on Genshin Impact's official X accounts.[208] Animated videos teasing its story and characters[209][210] are regularly released on Genshin Impact's official YouTube channels.[211] In September 2022, miHoYo announced a partnership with Japanese animation studio Ufotable to develop a speculated anime adaptation based on the game, accompanied by a concept trailer.[212][213] Other future plans include a line of comics, toys, and a possible movie.[214][215] The game has been criticized for initially lacking security features ubiquitous on other sites, like two-factor authentication. On October 19, 2020, a vulnerable security flaw was discovered that exposed the phone number linked to a player's account during the password recovery attempt on the miHoYo website. However, the issue was not rectified until November 9, 2020.[216] miHoYo issued notices following the wake of security exposures, informing players to be careful about sharing account details and to bind their account to their email address and phone number.[217][218] In May 2021, two-factor authentication was added whenever the player signs in on a new device.[219][220] Similar to other online games, the game uses an anti-cheat system implemented by a kernel driver. The driver is used to prevent other programs from performing code injection, memory inspection, and other process manipulation.[221][222] Shortly after release, players discovered that the game's kernel-based anti-cheat system would remain active after the game was closed or uninstalled,[223] which raised concerns that the game had installed spyware.[222] Some Japanese players using iOS devices also observed that the game read the contents of players' clipboards while starting up.[224] miHoYo announced that both issues were the result of coding errors and have been addressed and fixed.[225] On October 6, 2020, journalist and Twitch streamer Kazuma Hashimoto published a video on social media site Twitter (currently X) demonstrating how political terms controversial in China such as "Hong Kong" and "Taiwan" are censored within the in-game chat.[226] As the developer of the game, miHoYo, is based in China, which they are subject to China's censorship policy, which includes complying with a relatively large list of banned words that cannot be used in game or via chat.[226] Other terms not related to Chinese politics are banned as well, such as "Putin", "Hitler", and "Stalin".[227] Extending outside of purely political wordage, innocuous terms such as "enemies" and "words" were also being censored.[228] In 2021, the Chinese government stated that video game companies should avoid "obscene and violent content and those breeding unhealthy tendencies, such as money-worship and effeminacy."[166]:261 In a September 2021, over 200 Chinese video game companies signed a self-censorship pact, agreeing to remove content that would promote the "wrong set of values" and fall foul of Chinese government regulations on gaming.[229] In early 2022, HoYoverse released an update that provided new outfits for many playable characters that were more modest than the original designs.[166]:260–261 These alternate outfits were implemented as an additional option for global servers, but were mandatory in China.[166]:261 In response, some media outlets discussed whether this was an instance of the game of censoring its content.[230][231][232][233] In January 2025, HoYoverse issued a $20 million settlement to the Federal Trade Commission for selling loot boxes to children and collecting their personal data without parental consent. The complaint alleged that HoYoverse "deceived children and other users about the real costs of in-game transactions and odds of obtaining rare prizes" and that it collected the personal information of children in violation of the COPPA act. One of these alleged deceptions is that HoYoverse paid a streamer, SSSniperWolf, more than $100,000 to release an edited, promotional video in which she opens 12 loot boxes in a row and wins the character Zhongli, "conveying enthusiasm and excitement as she had been instructed". In the ad, she misleadingly refers to the loot boxes as "RNG", despite their outcome having been predetermined.[234] The settlement prohibits HoYoverse from selling loot boxes to children, requires the company to disclose the loot box odds, and requires them to delete the personal information of all users under 13.[235][236] ^ Published in China by miHoYo, in Vietnam by Funtap, and in Hong Kong, Macau, and Taiwan by Nijigen Games ^ Chinese: 原神; pinyin: Yuánshén; lit. The puppet (The Shogun) was created by Ei to govern Inazuma. ^ Omnipresence Over Mortals reveals that the spirit of Beelzebul lives within the body of the Raiden Shogun, and that the Shogun is essentially a puppet with its own consciousness. The two coexist in one body and act together. ^ The original Dendro Archon was Greater Lord Rukkhadevata, who ascended to the throne roughly 2000 years prior to the events of the game. Lesser Lord Kusanali, on the other hand, was created from the purest branch of Irminsul by Rukkhadevata 500 years before the events of the game during the Cataclysm that claimed Rukkhadevata's life. In the Akasha Pulses, the Kalpa Flame Rises questline, Traveler and Kusanali enter into the last memory of Rukkhadevata, where Kusanali is forced to remove the memory of her predecessor from Irminsul to restore it. This removes all references to Rukkhadevata having ever existed, and as a result, Kusanali is thereafter believed to have always been the original Dendro Archon. ^ a b c After ascending to the position of Archon 500 years before the main events of the game, Focalors separated her divinity from her vessel, Furina, resulting in
