How to reset BIOS admin password on Dell laptop? A lot of people are confused about this question. Dont worry. This post of MiniTool summarizes 4 accessible ways for the Dell laptop BIOS password reset.BIOS stands for basic input/output system and it is a firmware embedded on the chip on the computers motherboard.When your computer boots, BIOS is the first software to run and is responsible for waking up the computers hardware components, making sure they are up and working properly.It works as a communication interface between your computers hardware and operating system. If you forgot the BIOS password accidentally, then you may fail to start up the system. In this case, you may need to clear or reset Dell BIOS password.So, what types of passwords can be set up in BIOS of a Dell computer? Here are 3 main types of Dell BIOS passwords.System or User Password: You must enter it to log in to the computer. This type of password prevents an unauthorized user from using the computer. You cannot enter BIOS, access the boot menu, or boot into your operating system without the password.Setup or Admin password: When you access and make changes to the BIOS settings of the Dell laptop, you must enter the password. It can prevent an unauthorized user from accessing and making changes to the BIOS settings.HDD password: When you enter BIOS to access the hard drive and continue to boot into the OS, you must enter the password. It can prevent an unauthorized user from accessing your hard drive and booting into your system.Sometimes, however, many users forgot BIOS password of their Dell laptops. How to reset the BIOS admin password on Dell laptop? Lets keep reading.After investigating many posts and references, we summarized the following 4 simple ways for resetting Dell default BIOS password. You can try them in order or choose one that works best for you.Way 1. Reset Dell BIOS Password Via the Service ManualsThe first and simplest method for the Dell default BIOS password is to directly use the Dell Service Manuals. Heres how to do that:Step 1. Click here to open the Dell Manuals website.Step 2. Enter the Service Tag, Express Service Code, or the Serial number of your Dell computer in the box and click on Search. If you dont know where to find the Dell Service Tag/Serial Number, this post provides a guide for you. Or, you can also click on Browse all products and select your Dell product from the results.Step 3. Scroll down to the Manuals and Documents section, and then click on View PDForView Pagenext to the Service Manual of your Dell product.Step 4. Go to the BIOS setup program section and click on Clearing Forgotten Passwords. Then follow the on-screen instructions to complete the Dell BIOS password resetting.Note: The procedure may vary between different Dell laptops. Here we take Dell Inspiron 3252 for example.Way 2. Reset Dell BIOS Password Via the PSWD JumperIf you forgot BIOS password accidentally, resetting the CMOS or NVRAM can help you reset Dell default BIOS password. To do so, follow the steps below carefully.Note: Clearing the CMOS or NVRAM will use the PSWD jumper resets in BIOS, which includes the Dell BIOS user password, admin password, and HDD password. Well, it doesnt include any other passwords such as online accounts, Windows logon, and so on.Step 1. Before you start the following steps, make sure to read the Safety Precautions when working with electronic and electrical equipment.Step 2. Turn off your computer and disconnect it from the power source.Step 3. Navigate to the PSWD or CMOS jumper section according to your system board.Step 4. Remove the jumper plug from the password jumper pins carefully.Step 5. Power on your computer without the jumper plug to clear the Dell default BIOS password.Step 6. Wait until your laptop is loaded, and then shut down your computer and replace the jumper plug into its original location.Way 3. Reset Dell BIOS Password via a Pass CodeSome users reported that they perform the Dell BIOS password reset successfully by using a pass code. Here you may have a try.Step 1. Power on your computer and press F2 or F12 to enter BIOS settings.Step 2. In the BIOS settings, press the Unlock button and note down the System Number.Step 3. Now, open another computer and click here to open the Clear unknown BIOS passwords website.Step 4. Type the System Number you just wrote done into the Enter your code box and click on Get password. Then you should get the following codes:Dell HDD Serial Number (use this code to reset your HDD password)Dell from serial number(use this code to reset the Dell Admin password)Step 5. Go back to the Dell Setup Unlock screen, type the password you just got from the biospw org website, and press Ctrl + Enter to clear the admin password. If luckily, you can get the Dell BIOS password bypassed and make changes to BIOS settings.Way 4. Reset Dell BIOS Pasword by Contacting the Technical SupportAs you might know, BIOS passwords cannot be restored. So, we recommend you contact Dell Technical Support to get a password release code. It is based on the unique password prompt that is generated by your Dell computer.How to reset BIOS admin password on Dell laptop? The top 4 methods have been illustrated. Now, you can choose one that works best for you. How can financial brands set themselves apart through visual storytelling? Im stuck with black screen after booting. The keyboard lights and the front LED are on, nothing else. Powering on the laptop with pressing D starts the display test and it works so it is not a display issue. Let me explain how i got here. I have been using the laptop with ubuntu 19.10 booting in legacy mode. After the newest update and a reboot i got only in minimal grub. I was trying to repair grub and switched from legacy to UEFI which got me to a black screen, keyboard lights on and a 4 beeps signal that kept on repeating. Next i unplugged all peripherals and AC, opened the laptop removed the CMOS battery and the battery. Pressed the power button for 30sec, put everything back in order and tried to boot it. This time still black screen, keyboard lights on, but no beeping this time. Next i tried to flash the BIOS, following the solution here: ... I can see that the laptop boots and starts to read the flash drive but then nothing happens and the white LED keeps on blinking still black screen. Tied many many times to flash from the usb drive and waited for hours but nothing happens. The led on the usb flashes in the beginning while keyboard lights are on as well as the front indicator led. Then the light of the usb goes off and the indicator led on the front of the laptop flashes. Is there another way to reset the NVRAM?? Any other ideas i could try? Apart from this the laptop has been stellar and would love to keep it. Thanks. Hi all, I got an Dell XPS 13 9370 with admin password set. Already tried the master passwords from bios-pw Any of you have an idea how to remove this one? System Number: D51WYM2-6FF1 I can make a dump if necessary Re: Bios password Dell XPS 13 9370 I'm not sure if this is common knowledge but I just tried it and unlocked a couple of 7275 that wouldn't unlock with their 6FF1 master password. Manually change the suffix to 1F5A or BF97 and try the password you got from that. e.g. D51WYM2-1F5A = ly2Dta27gQQwyuFA or D51WYM2-BF97 = 8WQmzXZk5L11L239 Hold left Ctrl and press Enter when you've typed the password.Let me know if this works for you. Last edited by mp3boy; 01-14-2022, 01:06 PM. Re: Bios password Dell XPS 13 9370 hope someone can unlock mine? bios-pw(dot)org diddnt word for me, even not with ctrl + enter thanks in advance Write your service tag with suffix. --- Due to a lack of donations, server free space at a critical level, and possible closure of Bios Requests all donations are welcome, see the donate button at the bottom of the page, or >>>>> click on this link to donate via PayPal. > click on this link to donate via PayPal. > click on this link to donate via PayPal. > click on this link to donate
