At Hearst Networks EMEA, we share stories that matter. A global broadcaster since 1995, we reach audiences in over 100 countries, including the UK, Nordics, Benelux, Central & Eastern Europe, Spain, Italy, Germany, Africa and the Middle East. Our stories are global and local, linear and digital, and always compelling. Personalities shine at Hearst Networks EMEA. Our culture embraces individuals, in all their daring, passionate, ambitious glory. Our people are our strength, and our differences are celebrated. We challenge each other, collaborate and come together, just as a family does; winning as a team and celebrating as one too. Everyone has a voice and should feel proud and free to run with their ideas, enjoying their successes and journey with us. And in such an evolving industry, tomorrow is always today. We anticipate change, identify future opportunities and are excited by the potential that tomorrow brings. We want to be famous for creating and sharing stories that matter - unique, trusted, entertaining, everywhere. Whether our stories challenge and inspire intellectually or simply entertain, we know that we are making a positive contribution to our audiences across the many diverse regions and countries in the UK, Europe, The Middle East and Africa. Striving to always do so requires passion. And it's with just as much passion that we strive to gain new audiences with our creativity and by using innovative technology, by partnering with leading and emerging local platforms. With our diverse line-up of original, high-quality programming, our distribution partners across EMEA recognise the benefits of offering Hearst Networks EMEA's distinctive, high quality brands on their platforms and services. We understand the opportunity to grow engagement with new audiences of all ages and through new partnerships with Facebook, Twitter, YouTube, Instagram, TikTok and Snapchat, along with our podcasts and on-demand SVOD services, we ensure our programming and unique stories reach audiences across the full demographic spectrum. Join our global team of talent. At Hearst Networks EMEA you'll find a team of innovative, creative and collaborative people who embrace change and want to continually try new things. With offices in London, Rome, Madrid, Warsaw, Munich and Johannesburg, we are a truly international company that celebrates difference and diversity. We offer a range of benefits such as a generous pension plan, life assurance and holiday allowance, and there are useful local perks in various offices, and summer Fridays across the whole company. But most of all, we will support you to develop and grow throughout your time with us. Learning is part of the journey at Hearst Networks EMEA and you'll be offered personal and professional development opportunities throughout your career with us. We'll do everything we can to see you thrive and grow. Signed in Existing password New password Submit Updating your password... Success! Email New Where is the password field? Trouble logging in? Tomatometer 12 Reviews Avg. Popcornmeter In 2010, History's 12-hour series "America the Story of Us" illustrated how technology advanced human progress throughout American history. This follow-up series takes it a step further by expanding beyond America and taking a look at how technology has evolved throughout the world. The series covers key events that were turning points in the human journey in transitioning from hunter-gatherers to global citizens, including how people's lives in one part of the world are affected by events elsewhere. Among the topics covered are surviving the Ice Age, discovering farming techniques, the invention of movable type, creating the Industrial Revolution and exploring space. Actor Josh Brolin narrates. History photoPremiering: Tuesday, Nov. 13th from 8 to 10 p.m. (central) on History and continuing on the same nights and times for the next five weeksNarrated by: Josh BrolinProduced by: Jane Root, Ben GooldBy ED BARK@unclebarkycom Slam. Bang. Zoom.Stuck on hyper-drive and stuffed with hyperbole, Mankind: The Story of All of Us is history a-go-go from a programmer that used to obey a few speed limits.Not so with History network's "epic" 12-hour successor to America: The Story of Us. It's another breakneck trip aimed at a drive-through, short attention span nation. The special effects again are impressive and even jaw-dropping when it comes to the super-speed constructions of a modern day bridge and The Great Wall of China. So this is a production that will look great in HD while also assaulting your senses with a drum-pounding/ heavy metal whoosh through the first chapters on "Inventors" and "Iron Men."History network sent only these two opening hours for review, with 10 more to come on successive Tuesdays. It seemed like more than enough to get the drift, though. Josh Brolin narrates this time-shifting panorama of re-enactments, many of them featuring costumed extras in various forms of warfare.The talking head experts include NBC Nightly News anchor Brian Williams, who as usual is impeccably starched and pressed. He's also relatively calm compared to the likes of former Navy SEAL Richard "Mack" Machowicz, who acts and looks as though he'd be more than happy to re-arm himself and join the Spartans in their battle to repel the rampaging Persians."They're the baddest human beings on Planet Earth," he says with relish. "And they wanna stay that way."Military historian Mike Loades also fits right in as a semi-crazed hand-talker with a particular fondness for crossbows. Brolin, who has a lot of verbiage to unload in these first two hours, thankfully is a lower-keyed tour guide in comparison to these two. Still, the overall over-the-top approach at times overwhelms him.The title could just as easily have been Humankind in the interest of the many women who also made history. But Mankind it is, and these first two hours indeed are notably short on both female experts and characters. In truth, though, it was a highly chauvinistic man's world during the mostly B.C. centuries depicted on opening night. Brief attention is paid, though, to the world's first farmer, who is said to be a woman.Dr. Mehmet Oz and tart chef/world traveler Anthony Bourdain join Williams among the experts popping in. But only Williams gets much air time, and really not all that much. "We are a restless bunch, we humans," he says for openers. "We are always looking 'over there' . . . This is our hard-wiring. Our DNA."Tuesday's second hour ends with an image of Jesus Christ bleeding under a crown of thorns. Next week's third hour initially will spotlight His crucifixion, but perhaps not to the heavy metal soundtrack that accompanies most of the battle scenes. One gets the feeling, though, that Christ's tortuous march to Golgotha might well be whooshed through before -- whoosh -- there He is on the cross. And -- whoosh -- then came the resurrection. Forever and ever, amen. Mankind is a visual banquet, though. And even grade schoolers surely won't be bored by its cavalcade of battle scenes, some of which almost seem like video games. In other words, it's classroom ready.During its formative years, History network could be counted on for grainy black-and-white newsreel footage and a seeming fixation with World War II battleships. Lately it's been home to the Emmy-laden miniseries Hatfields & McCoys and those "jaw-dropping CGI" effects touted in publicity materials for Mankind.Sober, scholarly substance can get short-changed in these cases. But more viewers than ever before are watching this venerable network, whose 18-to-49 viewership likewise is on the rise. No television executive wants to be known for letting a channel go extinct. So History network continues to rock the past -- and make itself more contemporary as well.GRADE: B-minusunclebarky@verizon.net Cast & crewUser reviewsFAQFrom the power of science to how physics and biology combined to shape our shared journey, experience the human story like it's never been told before.From the power of science to how physics and biology combined to shape our shared journey, experience the human story like it's never been told before.From the power of science to how physics and biology combined to shape our shared journey, experience the human story like it's never been told before.38User reviews5Critic reviewsSign in to rate and Watchlist for personalized recommendationsSign inSuggest an edit or add missing contentBy what name was Mankind: The Story of All of Us (2012) officially released in India in English?AnswerYou have no recently viewed pages
