Advance concrete mixer

ShareAlike — If you remix, transform, or build upon the material, you must distribute your contributions under the same license as the original. Attendees are invited to speak with Advance specialists. The truck is designed for use in confined spaces and urban areas. With a 10.5-cubic-yard barrel, an FDC300 weighs about 27,000 pounds empty. Advance's new compact and manoeuvrable front discharge mixer will debut at World of Concrete 2025. (click on photo for more ... Streamlined maintenance An automated wash system is designed to simplify maintenance, while the trainer-friendly configuration makes it an excellent choice for fleet expansion. You'll find the perfect truck for you with the Commander Series. The Cadet is designed to go where other concrete mixer trucks can't while still operating under a standard batch plant. An automated wash system simplifies maintenance. For contractors working in developing areas, residential zones, or congested urban environments, the Challenger represents the future of concrete delivery: compact, efficient, and powerfully capable." Designed for urban construction sites Building on the legacy of the Commander and Charger series, the Challenger introduces a shorter wheelbase of 186 inches (15 feet six inches) and a turning radius of 31.5 feet, making it an excellent choice for urban job sites and confined spaces where the larger models might face challenges. Wheel Base Drum Configuration 11 yd Drum Engine MTU Series 1300 / Cummins ISX12 Our FD Commander Series trucks are engineered to take on the toughest of terrains. This advanced vehicle combines power, efficiency, and operator-friendly features in a compact, quiet, and maneuverable package. The standard 125-gallon pressurized water tank (with a non-pressurized option available) and 50-gallon fuel tank support extended operation without frequent refills. ADVANCE® FD4000 front discharge mixer truck incorporates front and rear tandem drive axles with disc brakes for improved braking performance and lower long-term operating costs. "We're thrilled to showcase the Challenger at World of Concrete 2025," said David Grabner, General Manager at Advance. Learn More A Terex family collaborative effort that enables us to offer a volumetric mixer truck that blends precision and power. Powered by a rear-mounted, 325-horsepower Cummins B6.7 diesel engine, the truck is paired with an Allison 3000 RDS 6-speed automatic transmission. "Its reduced footprint doesn't just mean easier navigation — it translates to improved fuel efficiency and reduced road and street damage, and a significantly quieter operational platform. The 6x2 rear engine configuration features a three-axle system that supports a 50,000-pound GVWR: a Dana D2200W front axle, Dana S23-172 drive axle, and Hendrickson HLM tag axle. The mixer's six-cubic-yard federal bridge capacity enables it to handle substantial loads despite its more compact footprint. Wheel Base Drum Configuration 11 yd Drum Engine MTU Series 1300 / Cummins ISX12 Challenger front-discharge concrete mixer truck from Terex Advance has a wheelbase of 185 inches and turning radius of 31 feet 6 inches, shorter than the company's Commander and Charger models. The mixer's 6-cubic-yard federal bridge capacity enables it to handle substantial loads despite its more compact footprint, according to the company. World of Concrete attendees will be the first to learn how this innovative mixer can transform their operations." The Challenger will be unveiled at World of Concrete January 21–23 at booth #C5176. Despite its more compact footprint, the Challenger produces 325 hp with a Cummins B6.7 engine, paired with an Allison 3000 RDS six-speed automatic transmission. Individual compartments store cement, aggregates, admixtures and water, but the actual concrete mixing starts on-site and only when your crew is ready. The combination of a Dana D2200W front axle, Dana S23-172 drive axle, and Hendrickson HLM tag axle provides optimal weight distribution and stability. No warranties are given. View Charger Models Our FD Commander Series trucks are engineered to take on the toughest of terrains. "At Advance, we are committed to developing solutions that help our customers work more efficiently in challenging environments. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use. The licensor cannot revoke these freedoms as long as you follow the license terms. The standard 125-gallon pressurized water tank and 50-gallon fuel tank support extended operation without frequent refills. Click on the links below to find out more information on our product range.
